

What is claimed is:

1. A method for a factory to replace a jobsite article of manufacture comprising the steps of:
 - A. designating for replacement a marble kitchen countertop of a known size in a known dwelling constituting said jobsite;
 - B. using a truck having a marble-cutting saw thereon;
 - C. loading upon said truck a slab of marble from a factory characterized in having confines exceeding said known size of said kitchen countertop;
 - D. using in transportation said truck from said factory to said jobsite;
 - E. setting up said marble slab in cutting relation to said marble-cutting saw;
 - F. transferring said kitchen countertop designated for replacement from its location in said dwelling to a position in superposed relation upon and within said confines of said marble slab;
 - G. demarcating, by using as a template said transferred kitchen countertop, a cutting guideline replacement countertop on said marble slab; and
 - H. cutting, by using said marble-cutting saw, along said cutting guideline;whereby there results in said marble slab at said jobsite an article of manufacture for replacement for said kitchen countertop removed from said dwelling.

2. A method for a factory to replace a jobsite article of manufacture comprising the steps of:
- A. designating for replacement a stone kitchen countertop of a known size in a known dwelling constituting said jobsite;
 - B. using a truck having a stone-cutting saw thereon;
 - C. loading upon said truck a slab of stone from a factory characterized in having confines exceeding said known size of said kitchen countertop;
 - D. using in transportation said truck from said factory to said jobsite;
 - E. setting up said stone slab in cutting relation to said stone-cutting saw;
 - F. transferring said kitchen countertop designated for replacement from its location in said dwelling to a position in superposed relation upon and within said confines of said stone slab;
 - G. demarcating, by using as a template said transferred kitchen countertop, a cutting guideline replacement countertop on said stone slab; and
 - H. cutting, by using said stone-cutting saw, along said cutting guideline;
- whereby there results in said stone slab at said jobsite an article of manufacture for replacement for said kitchen countertop removed from said dwelling.
